

App Store Module

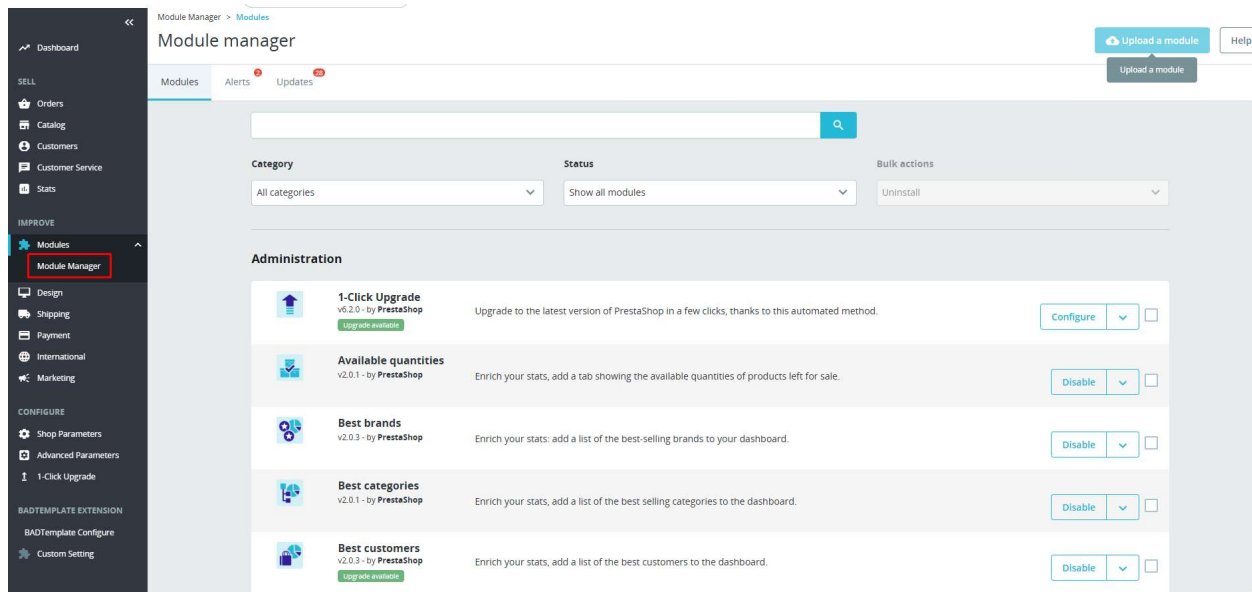

The App Store module is a comprehensive solution for managing and displaying your application store within your web application. This module provides a user-friendly interface for administrators to manage the application listings, while also offering a visually appealing front-end for end-users to browse and interact with the available applications.

Module installation

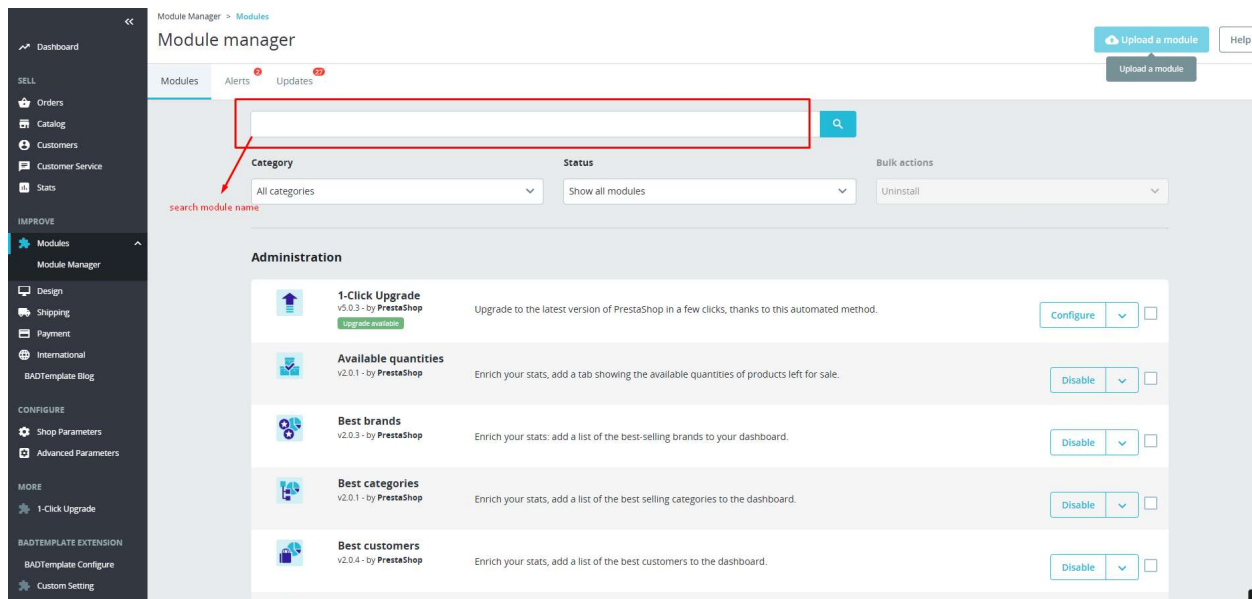

Follow these methods:

1. Using File Structure

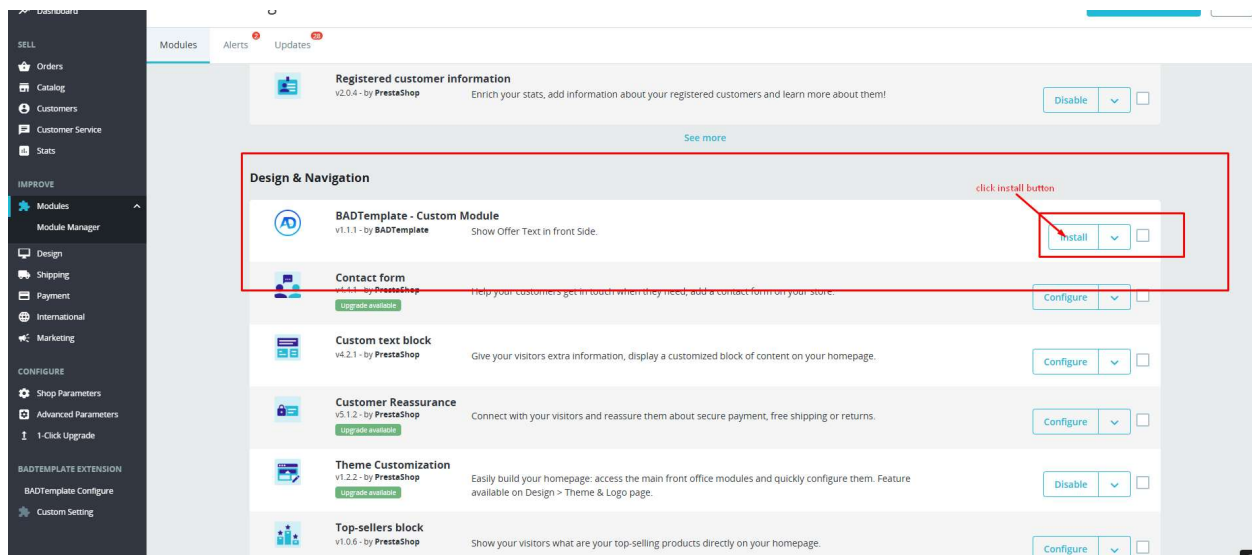

- 01.** Unzip (decompress) the module archive file
- 02.** Using your FTP software
- 03.** Place the folder in your PrestaShop /modules folder
- 04.** Connect to the BackOffice of your shop
- 05.** Go to Back Office >> Modules.

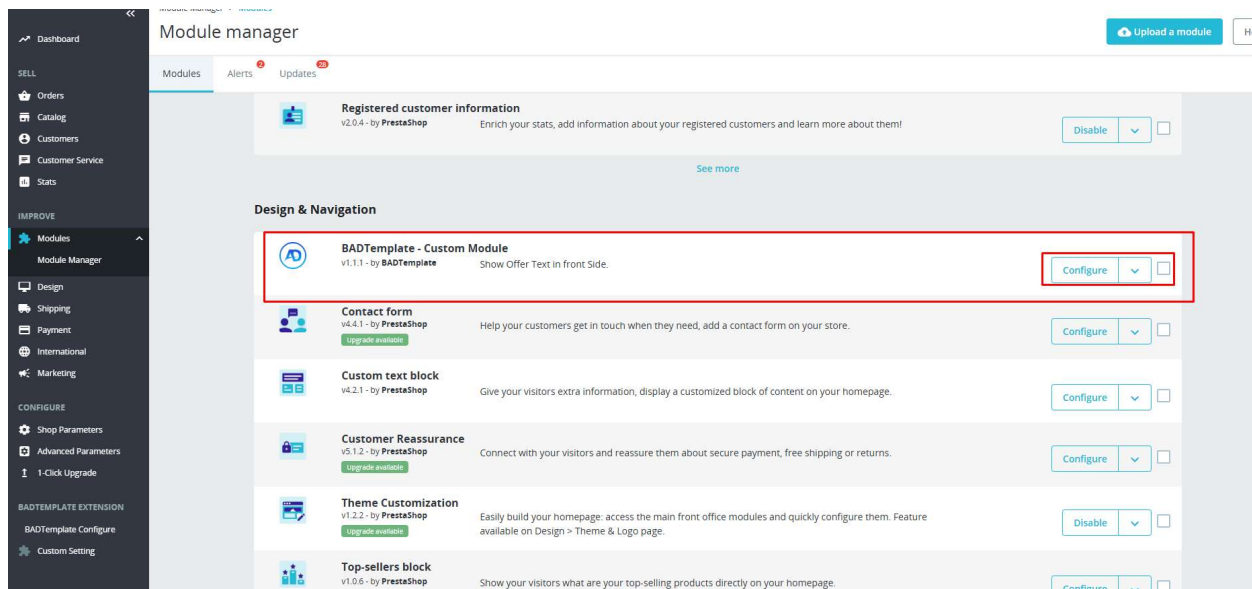

06. Locate the new module in the list, scrolling down if necessary.

07. In the row for the new module, click Install.

08. Locate the module again. If necessary, click >> Configure.

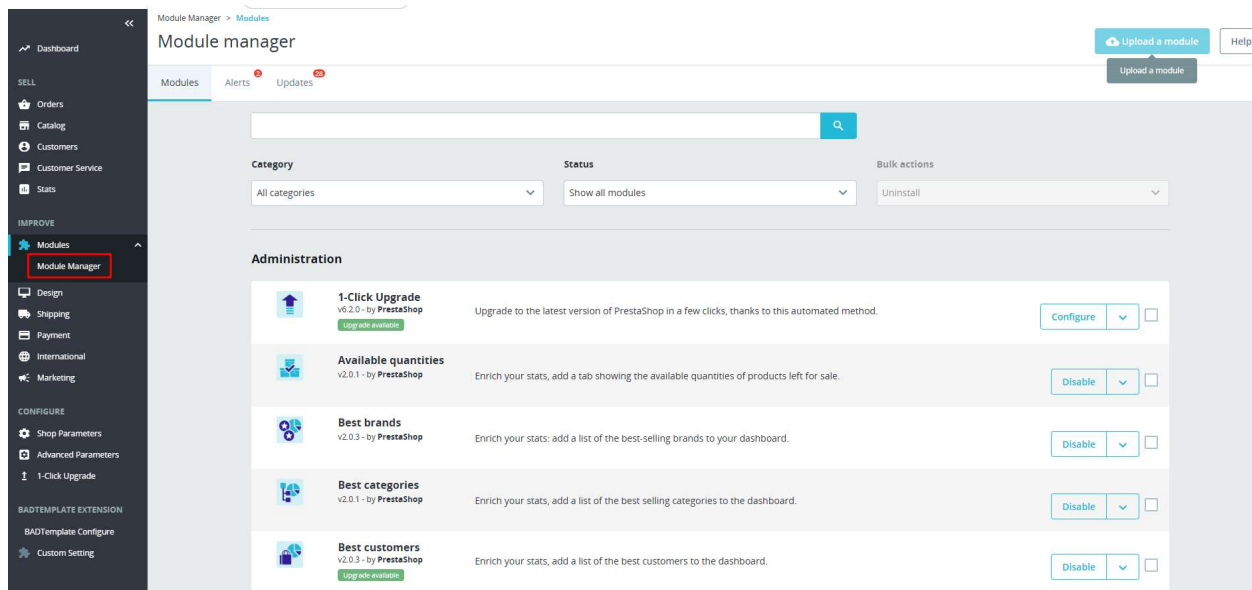

09. Once configuration is complete, be sure to test the module immediately to confirm that it functions as planned.

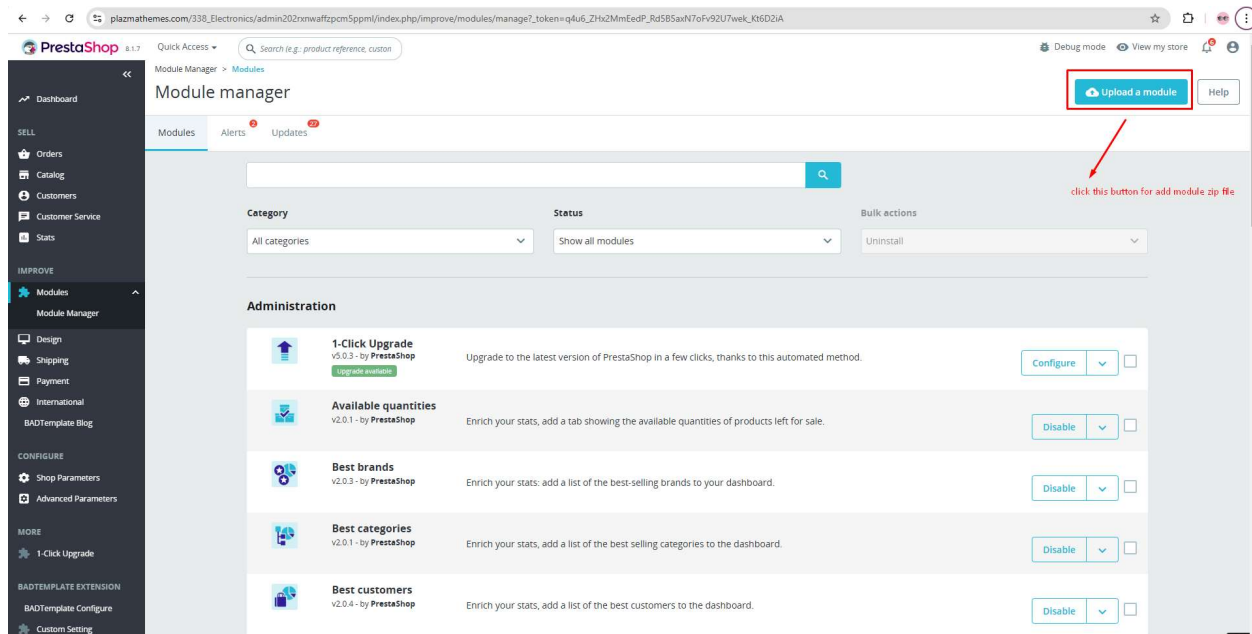

2. Using Back Office

01. Connect to the BackOffice of your shop

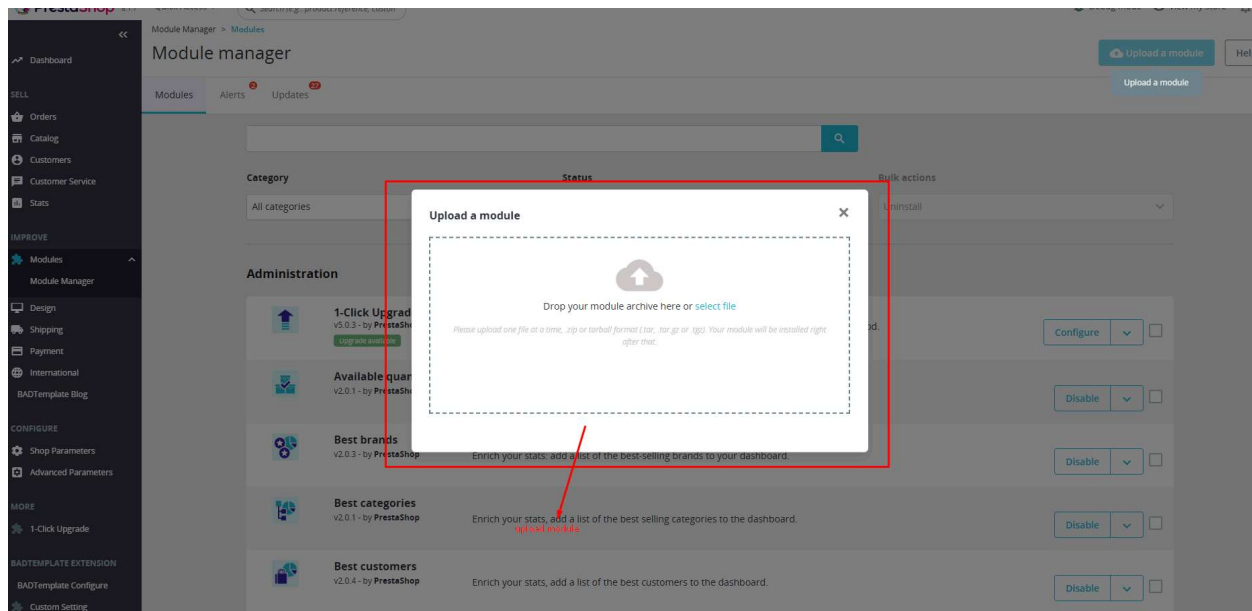

02. Go to Back Office >> Modules.

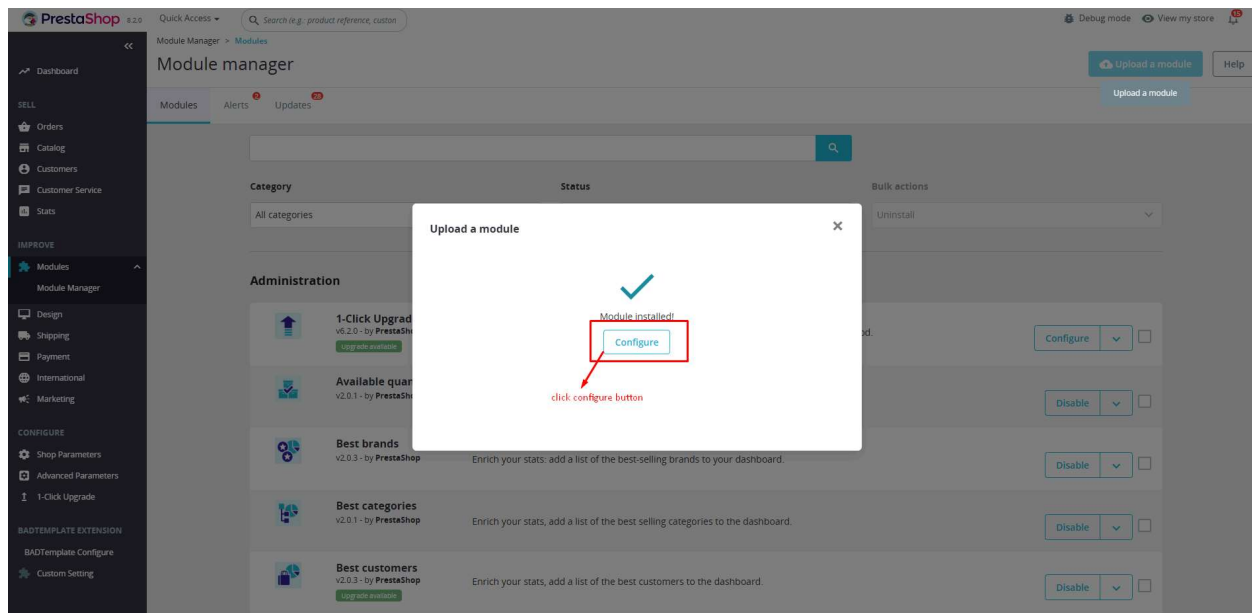

03. Click Upload Module Button

04. Add Module Zip File

05. Click Module Configure Button

06. Once configuration is complete, be sure to test the module immediately to confirm that it functions as planned

Module Configuration

Login To Your back-office and Navigate to the BADTemplate Configure > App Store.

Configure
BADTemplate - App Store
