

Plazma Themes

Plazma Themes is a modern, clean, and professional PrestaShop theme designed to enhance your online store. With its responsive layout and advanced features, it delivers an exceptional shopping experience across all devices. Perfect for businesses of all sizes, Plazma Themes combines style and functionality to boost your e-commerce success.

This documentation is for theme which is for PrestaShop 8.

Getting started

Basic information about PrestaShop 8 : <https://devdocs.prestashop-project.org/8/>
(<https://devdocs.prestashop-project.org/8/>)

PrestaShop System requirements : <https://devdocs.prestashop-project.org/8/basics/installation/system-requirements/> (<https://devdocs.prestashop-project.org/8/basics/installation/system-requirements/>)

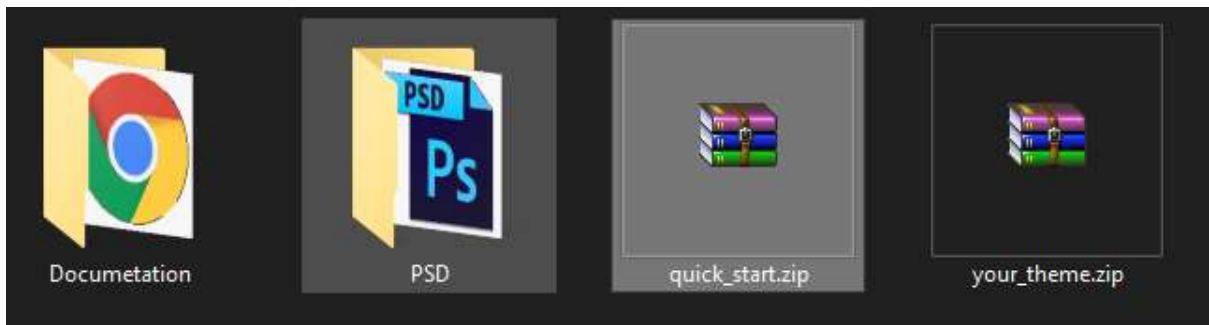

Install Prestashop

01. You will get Quick Start zip, Theme zip Documentation and Theme PSD in Prestashop.

First You have to install Latest Prestashop. or You can get Quick Start in Prestashop

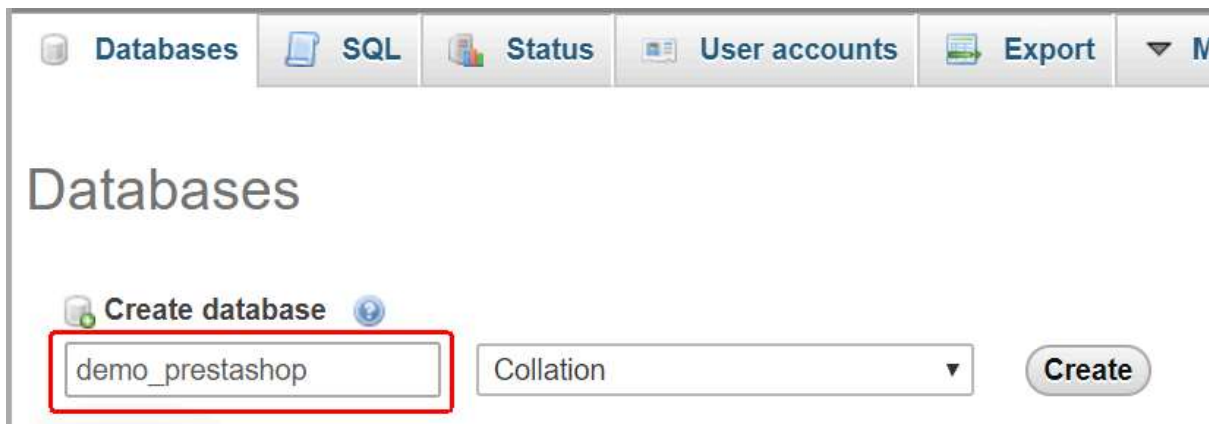

You can download prestashop Version 8 From Here.
(<https://prestashop.com/versions>)

Start to extract Quick Start.

Then open your Project in server. And you got first step of Prestashop install Page.

02. First You Have to make Database in Your Server.

We create "demo_prestashop" database for Prestashop.

03. Now Extract Quick Start Prestashop Zip. And Open in Webbroser.

This is First Step of Prestashop Installtion.

Select Your Language and Click on Next Button.

License Agreements

To enjoy the many features that are offered for free by PrestaShop, please read the license terms below. PrestaShop core is licensed under OSL 3.0, while the modules and themes are licensed under AFL 3.0.

Core: Open Software License ("OSL") v. 3.0

This Open Software License (the "License") applies to any original work of authorship (the "Original Work") whose owner (the "Licensor") has placed the following licensing notice adjacent to the copyright notice for the Original Work:

Licensed under the Open Software License version 3.0

1. **Grant of Copyright License.** Licensor grants You a worldwide, royalty-free, non-exclusive, sublicensable license, for the duration of the copyright, to do the following:

I agree to the above terms and conditions.

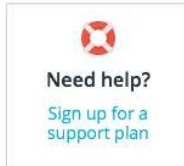

Back Next

Fill all Database Information. then click on "Test your database connection now" Button. You will get message. Then click on Next Button.

Installation Assistant

- ✓ Choose your language
- ✓ License agreements
- ✓ System compatibility
- ✓ Store information
- ▶ **System configuration**
- Store installation

Configure your database by filling out the following fields

To use PrestaShop, you must **create a database** to collect all of your store's data-related activities. Please complete the fields below in order for PrestaShop to connect to your database.

Database server address	<input type="text" value="127.0.0.1"/>
<small>The default port is 3306. To use a different port, add the port number at the end of your server's address i.e. "127.0.0.1:3306".</small>	
Database name	<input type="text" value="demo_prestashop"/>
Database login	<input type="text" value="root"/>
Database password	<input type="password"/>
Tables prefix	<input type="text" value="ps_"/>

Test your database connection now!

✓ Database is connected

Back

Next

Now Your Prestashop is Install. You have to show admin email id and password. And you can get admin and front side link by click on buttons.

[Discover the modules ▶](#)

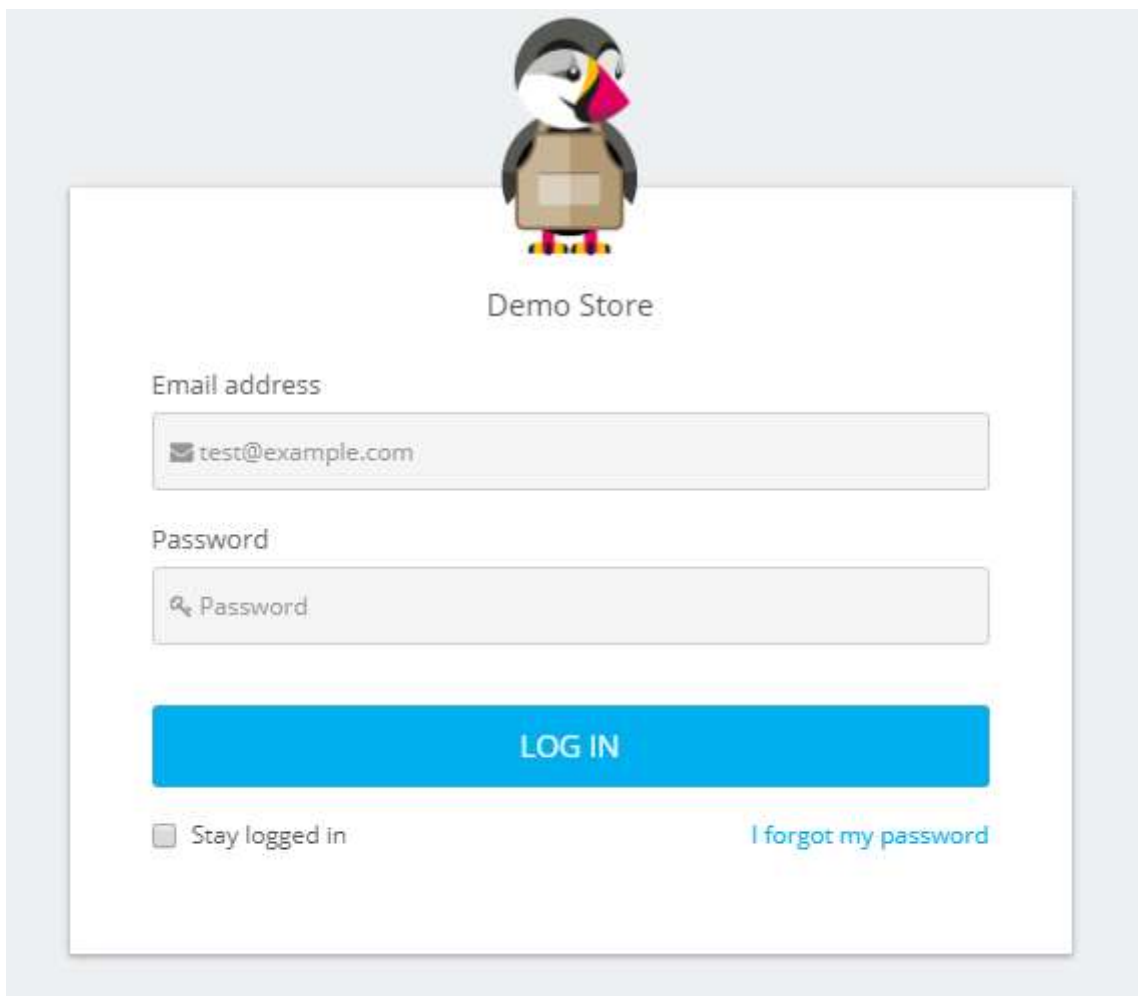

04. When You Open Admin Link. That time its show an error.

You have to remove install folder.

Now you can show login from admin panel.

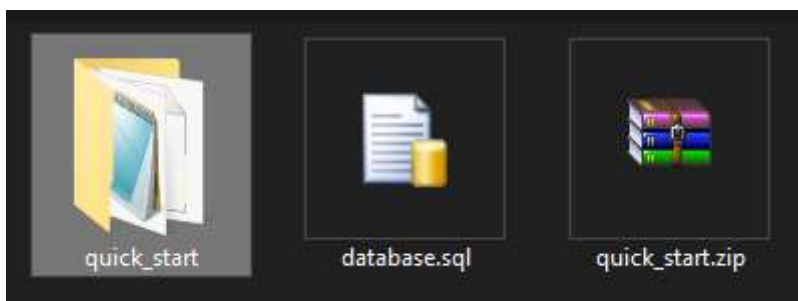

The screenshot shows a login interface for 'Demo Store'. At the top center is a cartoon penguin mascot wearing a brown apron. Below the mascot, the text 'Demo Store' is displayed. The form contains two input fields: 'Email address' with the placeholder 'test@example.com' and 'Password' with the placeholder 'Password'. A prominent blue button labeled 'LOG IN' is positioned below the password field. At the bottom left, there is a checkbox labeled 'Stay logged in'. At the bottom right, there is a link that says 'I forgot my password'.

Install Quick Start

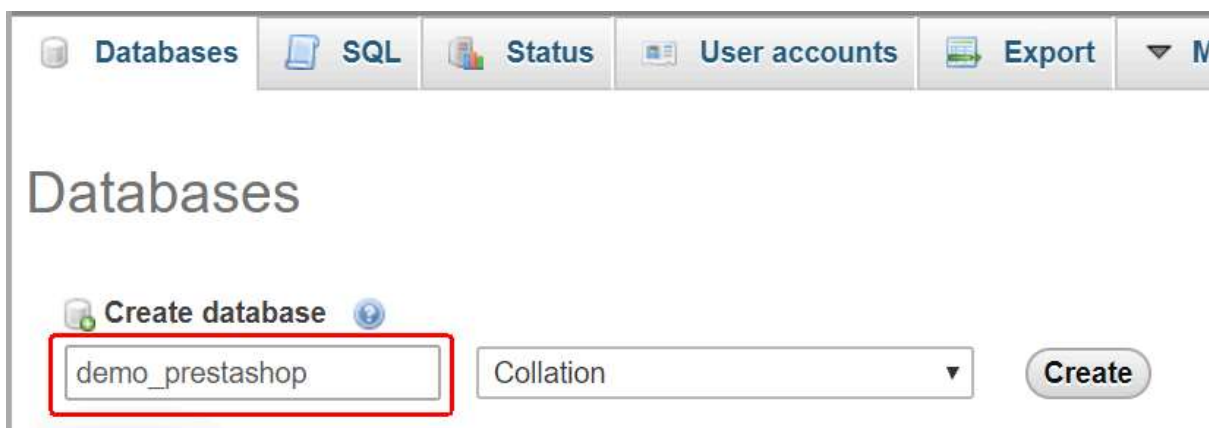

01. You have an "quick_start.zip" File. Extract that file.

You will get Prestashop Full Project Folder.

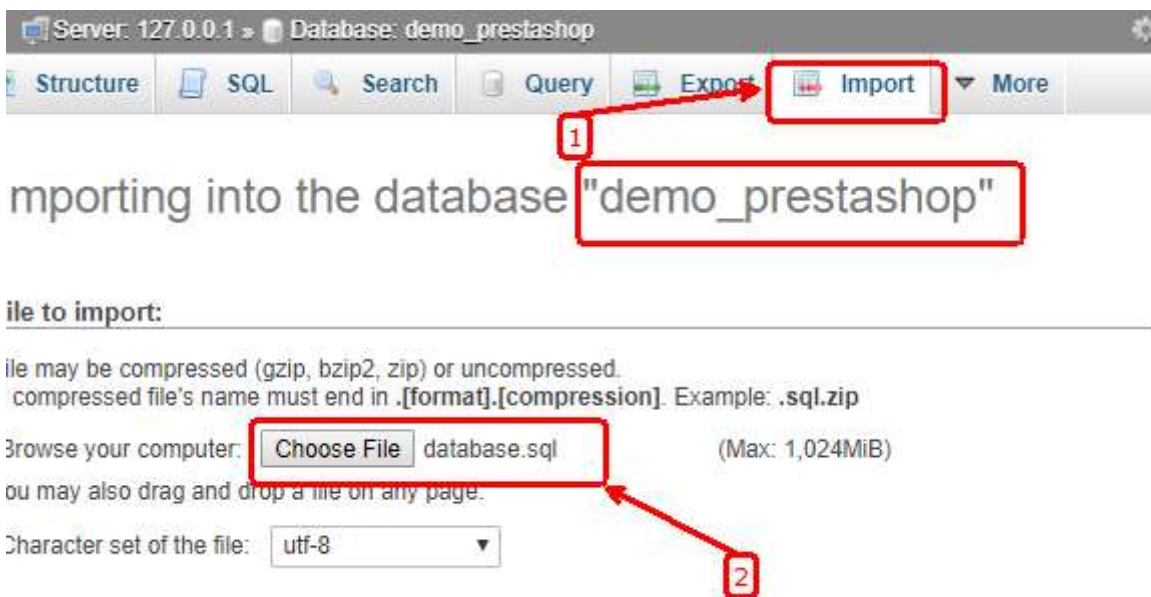

Now You can change your Prestashop Project Name.

02. Then You have to make database in Server.

Select That Database and Import "database.sql" file.

03. Then you have to set your Server Configuration in your Prestashop Project File.

Open Configuration File : **quick_start\app\config\parameters.php**

```

<?php return array (
  'parameters' =>
  array (
    'database_host' => 'localhost',
    'database_port' => '',
    'database_name' => 'demo_prestasop',
    'database_user' => 'demo_prestasop',
    'database_password' => '',
    'database_prefix' => 'psjr_',
    'database_engine' => 'InnoDB',
    'mailer_transport' => 'smtp',
    'mailer_host' => '127.0.0.1',
    'mailer_user' => NULL,
    'mailer_password' => NULL,
    'secret' => '
      qumls8xwaws1z76lmyhcr59iwydw41mdzzjxxxxtlassfgpiuxxypwgx'
    ,
    'ps_caching' => 'CacheMemcache',
    'ps_cache_enable' => false,
    'ps_creation_date' => '2019-05-10',
    'locale' => 'en-US',
  )
)

```

04. Then you have to Set your Project From Table.

Server: 127.0.0.1 » Database: demo_prestashop

Structure SQL Search Query Export Import Operations More

Page number: 1 >>>

Filters

Containing the word: shop_url

Table	Action	Rows	Type	Collation
ps_shop_url	Browse Structure Search Insert Empty Drop	1	InnoDB	utf8_general_ci
250 tables	Sum	6,793	InnoDB	latin1_swedish_ci

Check all With selected: >

Page number: 1 >>>

Open "shop_url" Table in your Database.

05.

Showing rows 0 - 0 (1 total, Query took 0.0023 seconds)

```
SELECT * FROM `ps_shop_ur1`
```

id_shop_ur1	id_shop	domain	domain_ssl	physical_uri	virtual_uri	main	active

Congratulations! You have successfully installed the Quick Start. Now you can use your Template.!

Note : After Install Quick Start you have to no need to Skip Theme install Process.

[Install Theme](#)

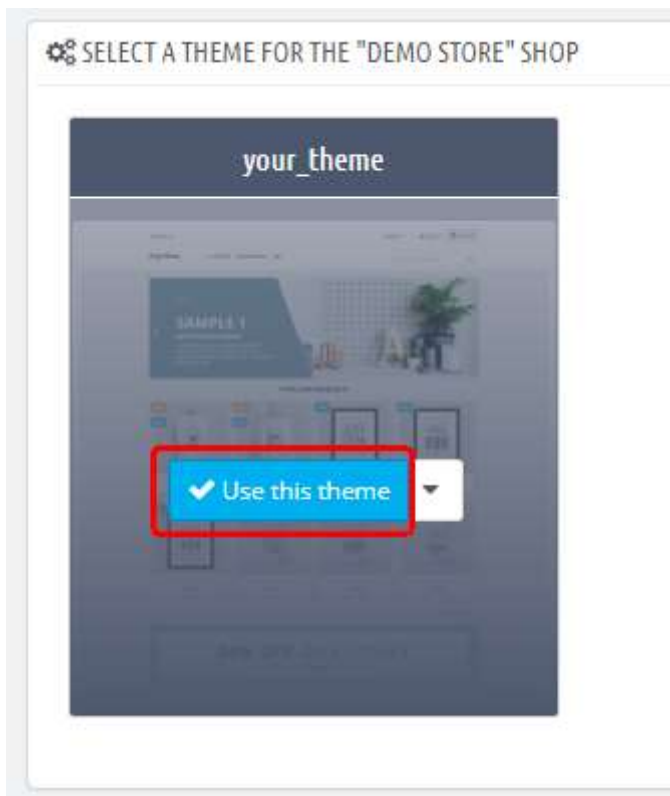

Upload Theme

01. Login to your back-office and navigate to the Design > Theme & Logo.
02. Click on the Upload a Theme button on the top toolbar.

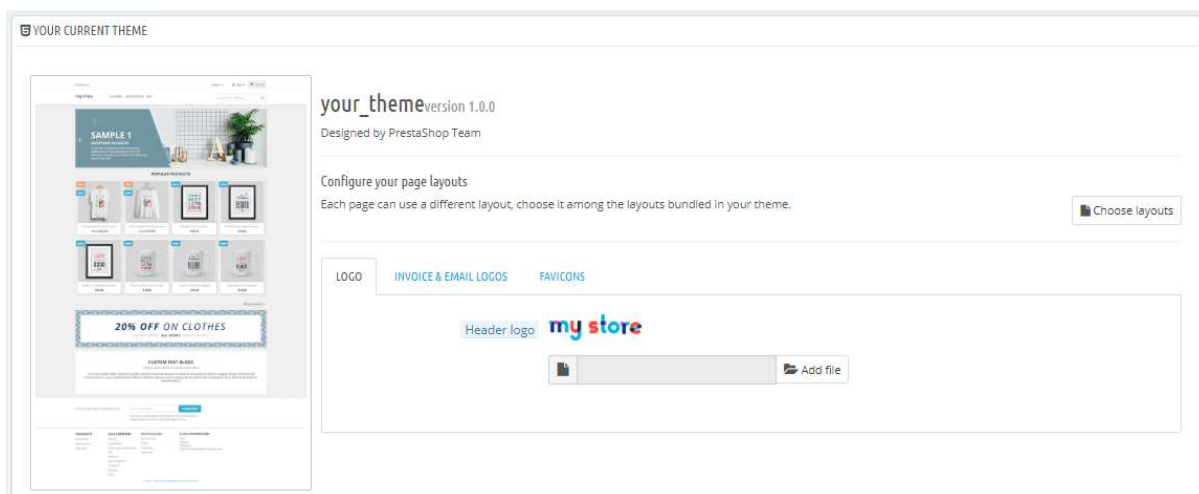

- 03.** In the "Import from your computer" section, click on the "Add file" button to select your_theme.zip and upload.

- 04.** If you have problems uploading the your_theme.zip file, there are two solutions:
- (1) Ask your hosting company for help to increase the 'upload_max_filesize' to at least 10 MB.
 - (2) Upload the your_theme.zip file to the /themes/ folder using a FTP client or cPanel, and then install from the "Import from FTP" section.

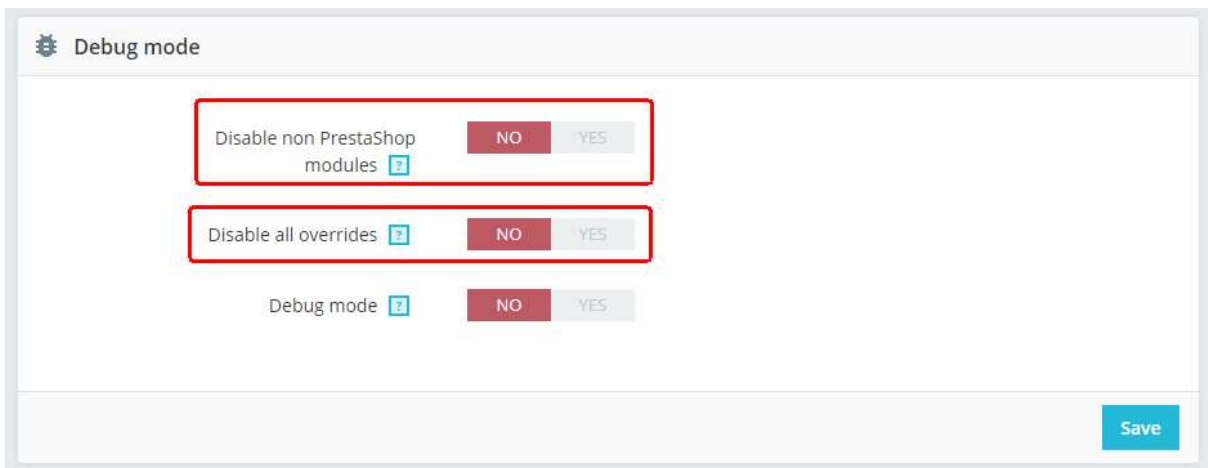

- 05.** Hover over the your_theme theme on the themes list, and then click on the "Use this theme" button.

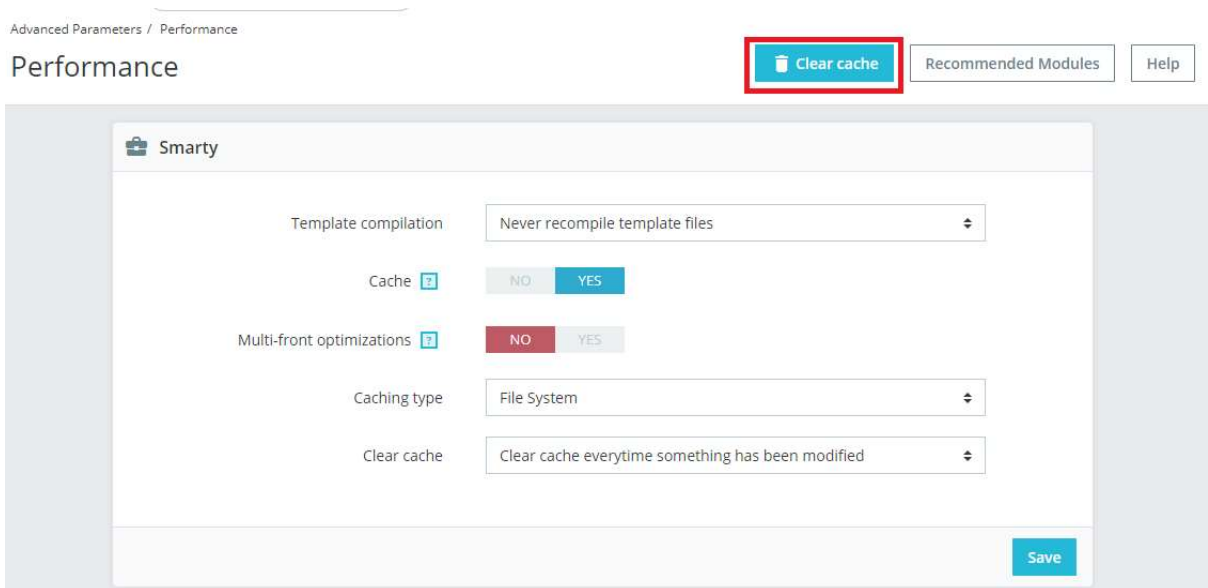

- 06.** After a while you will get a page like this, which means the theme has been successfully installed.

- 07.** This step is important, go to Advanced Parameters > Performance page, check if these settings "Disable non PrestaShop modules" and "Disable all overrides" are disabled, if they are not, disable them and save.

08. Clear the Smarty cache.

09. Congratulations! You have successfully installed the theme!

Theme Custom Setting

01. Login to your back-office and navigate to the Design > Image Settings.
Set Image Setting in as Show an image.

IMAGES GENERATION OPTIONS

? JPEG images have a small file size and standard quality. PNG images have a larger file size, a higher quality and support transparency. Note that in all cases the image files will have the .jpg extension.

WARNING: This feature may not be compatible with your theme, or with some of your modules. In particular, PNG mode is not compatible with the Watermark module. If you encounter any issues, turn it off by selecting "Use JPEG".

Image format: Use JPEG.
 Use PNG only if the base image is in PNG format.
 Use PNG for all images.

* JPEG compression:

* PNG compression:
